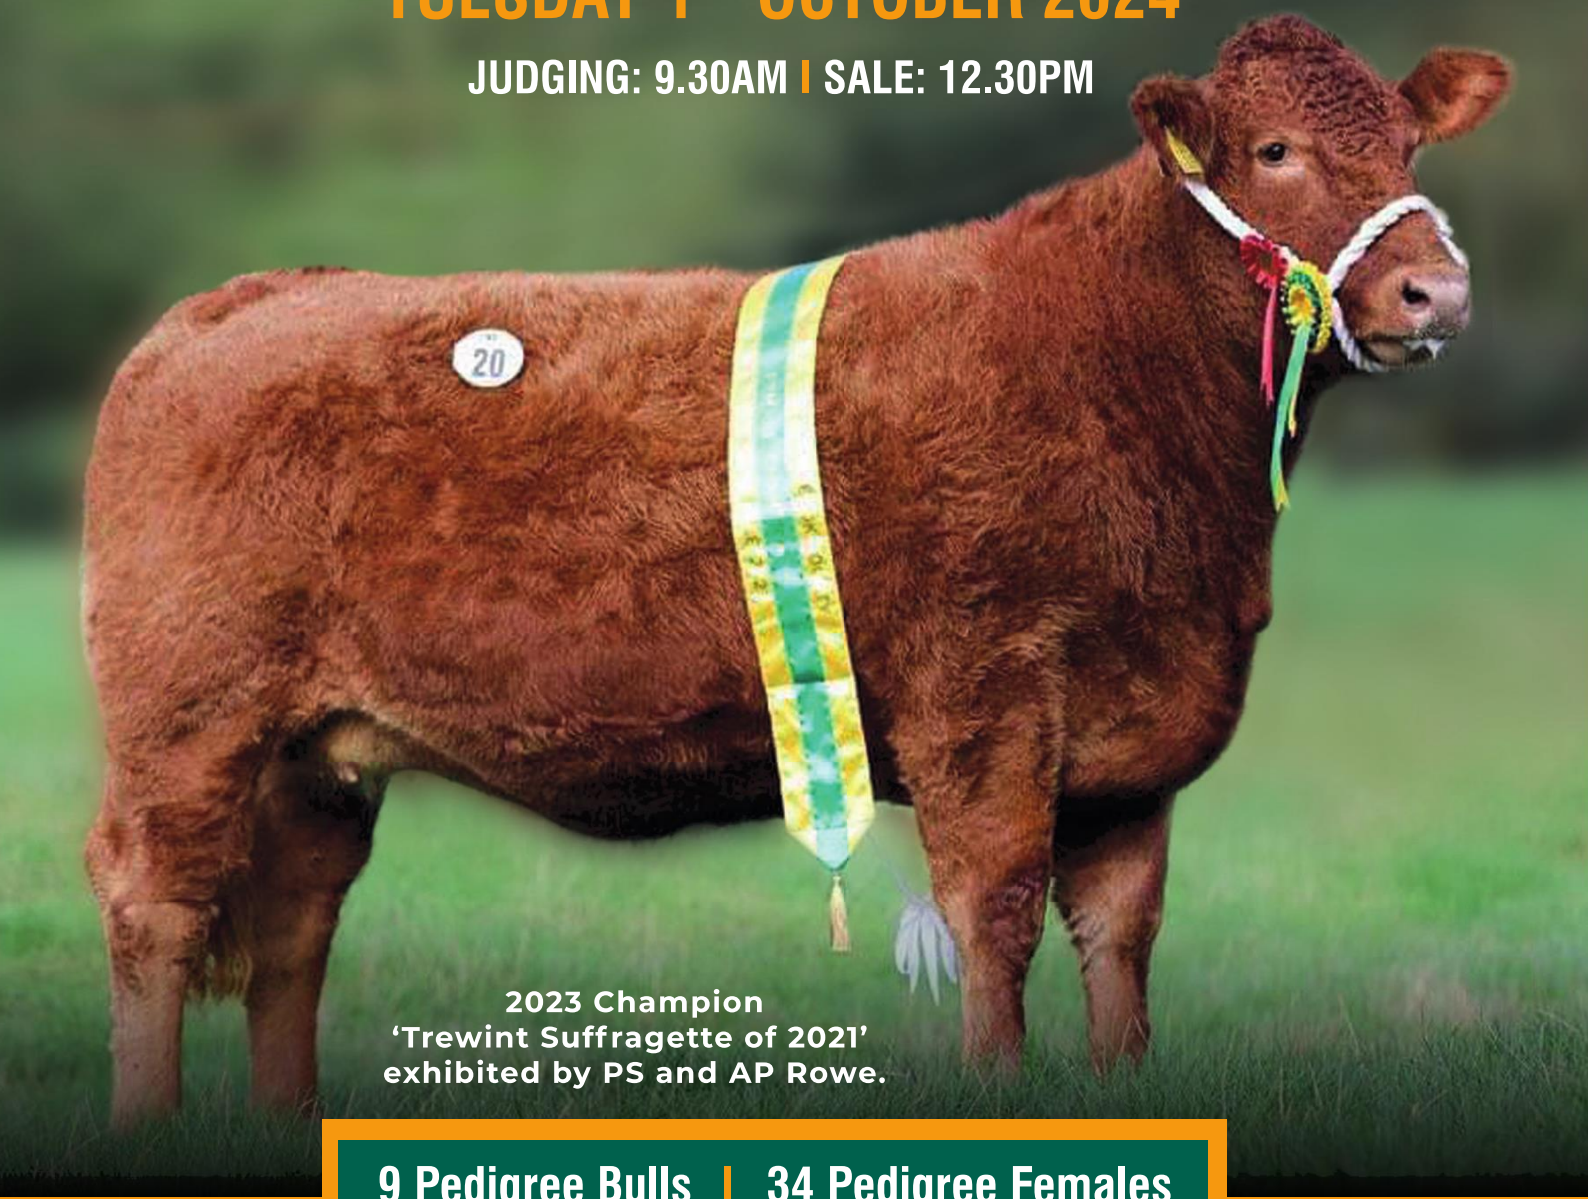
SOUTH DEVONS
PRIME BEEF

SOUTH DEVON HERD BOOK SOCIETY'S

AUTUMN SHOW & SALE 2024 AT WORCESTER

TUESDAY 1ST OCTOBER 2024

JUDGING: 9.30AM | SALE: 12.30PM



2023 Champion
'Trewint Suffragette of 2021'
exhibited by PS and AP Rowe.

9 Pedigree Bulls | 34 Pedigree Females

At Worcester Livestock Market | Nunnery Way | Worcester | WR4 0SQ

Sale by Auction under NBA Terms & Conditions of Sale

CONDITIONS OF SALE

1. The highest bidder shall be the purchaser and if any dispute shall arise between two or more bidders, the lot in dispute is to be put up again at the sum last bid or the Auctioneers may declare the purchaser.
2. The bidding is to be ruled by the auctioneers who may without giving any reason refuse to accept the bid of any person.
3. No person shall retract a bid without permission of the Auctioneers, who reserves the right to himself of refusing a bid, and also the right of withdrawing any lot or lots from the sale.
4. No bidder may advance less at a bid than the sum named from time to time by the Auctioneers.
5. The Purchaser must declare their name and address and if required to, pay the Auctioneers or his clerk the amount of purchase money immediately on the fall of the hammer. In default of which the lot or lots shall be offered again and re-sold, and under no circumstances must any lot be removed without first obtaining a pass from the clerk.
6. Title to each asset sold will only pass on payment in full by the Purchaser. Purchasers' attention is drawn to the Retention of Title clause 20.7 on the Conditions of Sale recommended for use in livestock auction markets by the Livestock Auctioneers Association as displayed in the sale office.
7. The Auctioneers reserve the right of deviating from the catalogue either by amalgamation or dividing the lots, as circumstances may require, and also by deviating from the order of sale.
8. The lots are to be under the immediate care of the Purchasers who must take the same with all faults, imperfections and errors of description (if any) and remove the same at their own expense and risk, and no purchaser shall be allowed to remove lots from the premises until the whole of the purchase money is paid.
9. All statements contained in this catalogue as to the authenticity, genuineness, date, age, condition, or quality of any lot are statements of opinion and are not taken as to implying, statements or representations of fact.
10. Intending purchasers must satisfy themselves by inspection as to all such matters as to the physical description of any lot.
11. Neither the Vendor(s) of any lot nor the Auctioneers make or give any representation or warranty as to fitness for purpose or the quality of lots sold.
12. If any lots are described at the time of sale as in 'working order' such lots shall have no defect which renders them incapable of the reasonable work for which they are intended and they must be capable of performing such work.
13. The Purchaser is to make good any damage done to the premises by the removal or otherwise of any lot or lots.
14. The Purchaser shall not be entitled to any right of "Set Off" against the Vendor or the Auctioneer.
15. In the case of lots upon which this is a reserve, the Auctioneers shall have the right to bid on behalf of the seller.
16. Upon failure to comply with the above conditions, the uncleared lots will be re-sold either or by public or private sale and the deficiency (if any) and all expenses attendant thereon, shall be made good by the defaulters at this auction, who shall have no claim for any surplus that may arise.

17. The Auctioneers may rescind any sale within 3 hours of the final lot being sold if the lot has been sold under reserve. In the event of such rescission the purchase price or any part already paid by the Buyer shall be repaid but the parties and the Auctioneers shall be under no further liability to each other.
18. LIVESTOCK. ALL LIVESTOCK ARE SOLD WITH THE WARRANTIES AND RESPONSIBILITIES AS LISTED IN THE CONDITIONS OF SALE FOR CATTLE, CALVES, SHEEP AND PIGS AT LIVESTOCK AUCTION MARKETS RECOMMENDED FOR USE BY THE LIVESTOCK AUCTIONEERS ASSOCIATION WHICH ARE DISPLAYED IN THE AUCTIONEER'S OFFICE AT THIS SALE.
19. COMPLIANCE WITH ROAD TRAFFIC ACTS The Purchaser of any vehicle or trailer is responsible for complying with all legal requirements as to the construction and the use of such vehicle or trailer and for obtaining all certificates, permits or other authorisations necessary before such vehicle or trailer can be used on the road.
20. HEALTH AND SAFETY AT WORK ACT 1974 AND ALL OTHER ACTS AND REGULATIONS APPLICABLE TO FARM SAFETY
    The Purchaser of any lots is responsible for complying with all legal requirements as the safe use of lots purchased at the sale and shall ensure compliance with all relevant legislation relating to the safe use of such lots.
21. TRADE DESCRIPTIONS ACT 1968 – The Vendor is reminded that under the terms of the Traders Description Act 1968 the Vendor of any lots to which a false description is applied may be guilty of a criminal offence punishable by fine or imprisonment.
22. MEMBER'S ACCOUNTS REGULATIONS 1993 NOTICE REQUIRED UNDER REGULATION 2A This sale is not required to comply with the requirements of the Member's Accounts Regulations of the Royal Institution of Chartered Surveyors. No monies paid are covered by any scheme for protection of clients' monies operated by the Royal Institution of Chartered Surveyors. This notice is published in accordance with the requirements of the Royal Institution of Chartered Surveyors from whom a more detailed explanation can be obtained by writing to:

    THE STANDARDS AND PRACTICE DEPARTMENT
    THE ROYAL INSTITUTION OF CHARTERED SURVEYORS
    2 GREAT GEORGE STREET

SOUTH DEVON HERD BOOK SOCIETY

A COMPANY LIMITED BY GUARANTEE
(INCORPORATED 1891)
Registered Charity No. 254166 Company No. 35107

AUTUMN SHOW & SALE 2024

PRESIDENT
Mr Rodger Laity, Lower Goneva Farm, Gwinear, Hayle, Cornwall

JUDGE
Mr David Sandbach, Perlees Farm, St Breock, Wadebridge, Cornwall

VETERINARY INSPECTORS
Duncan Findlay, MRCVS Vale Veterinary Group, Cullompton, Devon

FRAME SCORES
Frame score measurements will be taken by Mr R V Hartshorn

BREED SECRETARY
Mr Andy Ryder
Registered Office: Holme House, Dale, Ainstable, Carlisle CA4 9RH
Telephone: 01392 447494 E-mail: info@sdhbs.org.uk

Disclaimer:
The information given in this catalogue has been produced from information submitted to SDHBS by breeders and responsibility for its accuracy cannot therefore be assumed by the Society. All DNA certification is issued by a testing laboratory from samples submitted by breeders and their representatives, and therefore the SDHBS is not responsible for the accuracy of any declarations of DNA status.

Judging commences at 09.30am beginning with Females.
The following competitions will be judged:

FEMALES

ALL ANIMALS WILL BE SOLD IN CATALOGUE ORDER

THE WADDETON PERPETUAL CUP

The Tully Partnership having won the Sexton Cup outright have very kindly presented the above Cup for the Female Champion judged on inspection only.

2023 Autumn Sale ……. P S & A P Rowe

2024 Spring Sale …….. The Tully Partnership

THE KESTLE PERPETUAL CUP

Mr R K Rundle having won the Alger Cup outright has very kindly presented the above Cup for the Reserve Female Champion, judged on inspection only.

2023 Autumn Sale ……. P S & A P Rowe

2024 Spring Sale …….. G W J & L F Pluess

THE GREENSLADE PERPETUAL CHALLENGE CUP

Messrs W R J Greenslade & Co have very kindly presented the above Cup, to be awarded to the Best Pair of Females bred by the Vendor.

2023 Autumn Sale ……. P S & A P Rowe

2024 Spring Sale …… not awarded

THE COLCHARTON PERPETUAL CUP

The Tully Partnership having won the Colcharton Cup outright, Messrs R J & C J Edwards have very kindly presented the above Cup for Best Polled Female, judged on inspection only. The Colcharton Cup was most recently won by:

2023 Autumn Sale …… Mr R V Hartshorn

2024 Spring Sale …… not awarded

THE BRISTOL SALES CENTRE PERPETUAL CHALLENGE TROPHY

Mr K Sherrell has very kindly presented the above Trophy for the Best Female gaining most points on inspection and performance, for Breedplan recorded herds. Inspection points up to a maximum equivalent to the highest individual performance points. Performance points to be equivalent to double the difference between the value of the animal's Suckler Replacement Index and the value of the breed average Suckler Replacement Index.

2023 Autumn Sale …… A Scott

BULLS

ALL ANIMALS WILL BE SOLD IN CATALOGUE ORDER, EXCEPTING
LOT 10 CHAMPION BULL, LOT 11 RESERVE CHAMPION BULL;
LOT 12 WINNER OF THE THORNTON CUP

THE ROSKYMER SUPREME CHAMPION CUP – LOT 10

Messrs W W Williams & Sons have very kindly presented the Roskymer Cup for the Champion Bull, having won the Sexton Cup outright. For this Sale, the Cup shall be awarded for the Best Bull judged on inspection only.

2023 Autumn Sale …… Roden Livestock
2024 Spring Sale …… P S & A P Rowe

THE ROWE CUP – LOT 11

The Rowe family have very kindly presented the Rowe Cup for the Reserve Champion Bull, to be judged on inspection only.

2023 Autumn Sale …… The Tully Partnership
2024 Spring Sale …… R J Throssell & J A T Warwick

THE THORNTON CUP – LOT 12

Messrs John Thornton & Co have very kindly presented the above Cup to be awarded to the Vendor gaining the greatest number of points on inspection and performance, for Breedplan recorded herds. Points will be awarded as follows: performance 75, inspection 75 = total 150. Points for performance points will be:

200 day weight – 2 points per kg above breed average – max 40
400 day weight – 1 point per kg above breed average – max 35

2023 Autumn Sale …… The Tully Partnership
2024 Spring Sale …… R J Throssell & J A T Warwick

THE MACFARLANE CUP

Mr I & Mrs G Macfarlane have very kindly presented the above Cup to be awarded to the Best Pair of Bulls bred by the Vendor.

2023 Autumn Sale …… not awarded
2024 Spring Sale …… P S & A P Rowe

THE POLLED SOUTH DEVON PERPETUAL CUP

R J & C J Edwards having won the Cup outright, have very generously represented it as a Perpetual Cup. The Cup shall be awarded for the Best Polled Bull judged on inspection only.

2023 Autumn Sale …… The Tully Partnership
2024 Spring Sale …… not awarded

THE CIBA-GEIGY PERPETUAL TROPHY

This Trophy was very generously donated by Ciba-Geigy Agrochemicals and is awarded to the exhibitor gaining most points at the Spring and Autumn Society Sales during the year.

2023 Sales …… P S & A P Rowe

HEALTH DECLARATIONS

Information regarding health status, testing, and declarations are as at time of catalogue publication.

Health Declarations

A Health Declaration signed by the Vendor is required for each herd. Information taken from this Declaration is included under the Index of Vendors below, which relates to the herd's health status, TB testing, its Johnes risk level, and to BVD testing of the individual sale animals. A copy of the Declaration with full information is attached to each Vendor's group of pens.

Bovine Tuberculosis (TB)

All vendors have signed a Declaration stating that the animals they have entered in this Sale have been TB tested within 60 days prior to the date of the Sale. Bovine Viral Diarrhoea (BVD) It is an obligatory requirement of the Society that each Sale animal is from a herd that is accredited free of BVD under a CHeCS health scheme **or** has been tested negative for the BVD antigen. **All** Sale animals must also have completed a BVD vaccination course at least one month prior to the Sale and (for heifers) at least one month prior to service.

Johnes

It is NOT a requirement that animals must come from Johnes-tested herds.

Definition of levels within the Johne's Disease Accreditation Programme (CHeCS)

Level 1: Herds must have had three consecutive clear herd tests at annual intervals. The first of these cannot be sooner than 12 months following the identification of a Johne's disease reactor in the herd. Level 1 will be further defined by stating the year in which the herd achieved level 1 accreditation.

Level 2: This applies to all herds that have had an initial, or two consecutive, clear tests, but are yet to achieve level 1 status. The first of these clear tests cannot be sooner than 12 months following identification of a Johne's disease reactor in the herd.

Level 3: These are herds that have reactors identified within the herd, but the number of reactors must not exceed 3% of the herd eligible for testing in the Johne's programme (cattle two years of age and older). In herds with fewer than 33 eligible animals no more than one of these is a reactor.

Level 4: These herds have more than 3% of eligible animals identified as reactors, or in herds with fewer than 33 eligible animals more than one of these is a reactor.

Level 5: These herds may be carrying out a testing programme but are not adhering to the mandatory requirements of the programme.

Neospora

Vendors of females have signed a declaration that neither their lotted females nor the dams of those females have ever tested positive for neospora.

Definition of levels within the Neospora Disease Accreditation Programme (CHeCS)

Level 1: Herds that have had three or more clear consecutive annual herd tests

Level 2: Herds that have had one or two clear consecutive annual herd tests

Level 3: Herds where less than 5% of the eligible animals were positive

Level 4: Herds where more than 5% of the eligible animals were positive

Level 5: Herds that are not complying with the CHeCS rules for the Neospora programme

INDEX OF VENDORS & HEALTH STATUS

		BULLS	FEMALES
M E & T E BROOME	**WELLAND VALLEY**		31-34, 36-45

Manor Farm, Thorpe Langton, Market Harborough,
Leicestershire, LE16 7TS
Tel: 07732 331372
Yearly TB testing, last clear test 07/03/2024
Member of Biobest HiHealth Herdcare:

- Risk level 1 for Johnes since 17/02/2014
- Accredited free of BVD since 07/02/2019

K FINCH	**PYTCHLEY**	3	12-14, 16-18

Filbert Lodge Farm, Yelverton Road, Crick,
Northamptonshire, NN6 7TF
Tel: 07850 852678
Yearly TB testing, last clear test 13/08/2024
Member of Biobest HiHealth Herdcare:

- Risk level 1 for Johnes since 2014
- Accredited free of BVD since 27/06/2021
- BVD vaccinated 13/08/2024 (single dose)

- Accredited free of BVD since 03/01/2013
- Accredited free of IBR and Lepto since 04/12/2007
- Risk level 1 for Neospora
- BVD vaccinated 16/02/2024 (single dose)

MYOSTATIN IN THE SOUTH DEVON BREED

Myostatin is a gene that is connected to the production of proteins that affect muscle development. When the gene is “switched off” or “deleted”, muscle mass can continue to increase more than it should. So myostatin status will influence your cattle breeding programme.

The myostatin variant found most frequently in the South Devon breed is ‘nt821’ which is known as ‘disruptive’. A lesser number of animals in the breed carry the ‘F94L’ myostatin variant which may be associated with lower birth weight.

Knowing the myostatin status of your animals will help in the selection of bulls and female breeding replacements so that the mating match will be as productive and safe as possible. However, it is just one tool which should be used in conjunction with the wider information available such as EBVs, pedigree, and most importantly your own judgement and eye.

All South Devon pedigree registered bulls are DNA tested to determine their myostatin status, such information being published in the catalogue and on pedigree certificates. Although it is not obligatory to test females for myostatin status, some breeders choose to do so and the result is published where known. The status is expressed as either:

0 No copy of the deleted myostatin gene,
1 Heterozygous, so carrying one copy of the deleted myostatin gene (inherited from one or other parent), or
2 Homozygous, so carrying two copies of the deleted myostatin gene (inherited from both parents)

The table below shows the chances of inheriting depending on the myostatin status of the parents.

Both parents homozygous (2 x ‘2’ status)	→	100% chance of homozygous progeny (‘2’ status)
One parent homozygous (‘2’ status) One parent heterozygous (‘1’ status)	→	50% chance of homozygous progeny (‘2’ status) 50% chance of heterozygous progeny (‘1’ status)
One homozygous parent (‘2’ status) One non-carrier parent (‘0’ status)	→	100% chance of heterozygous progeny (‘1’ status)
Both parents heterozygous (2 x ‘1’ status)	→	25% chance of homozygous progeny (‘2’ status) 50% chance of heterozygous progeny (‘1’ status) 25% chance of non-carrying progeny (‘0’ status)

One parent heterozygous (1 x '1' status) One parent non-carrier (1 x '0' status)	→	50% chance of heterozygous progeny ('1' status) 50% chance of non-carrying progeny ('0' status)
Both parents non-carriers (2 x '0' status)	→	100% chance of non-carrying progeny ('0' status)

The implications for an animal having one or two copies of the **'nt821'** deletion have been researched by the Roslin Institute. Their findings were that this particular deletion tends to improve muscle conformation, reduce fat, and increase hot weight at slaughter. But it also tends to increase birthweight, decrease calving ease, reduce weight gain, reduce internal organ and bone size, and reduce eating quality. These effects are most obvious when the animal has two copies ('2') of the 'nt821' variant, one inherited from each parent.

No formal research has been carried out by the breed in the United Kingdom on the **'F94L'** deletion to date, but calving data shows smaller birth weights followed by good growth.

For further information, please contact the Breed Secretary or Neogen (Igenity).

UNDERSTANDING SINGLE STEP BREEDPLAN PERFORMANCE RECORDING

ESTIMATED BREEDING VALUES (EBVs)

The EBV is the best estimate of an animal's genetic merit for that trait. Each breed's EBVs are calculated specifically for that breed, for comparisons within the breed, **and there can be no cross comparison between breeds.**

SINGLE STEP BREEDPLAN adds a further dimension to the calculation of EBVs and accuracy, with genomic information incorporated simultaneously with pedigree and performance data. The analysis takes account of the genomic relationships that exist between all individuals in the genotyped population – which means actual calculated relationships are used rather than "average relationships" based on recorded pedigree.

Accuracy: An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. **Low accuracies should be treated with caution.**

Calving Ease: Calving Ease EBVs are based on calving difficulty scores, birth weights and

gestation length information. **Negative EBVs mean more difficult calving whilst positive EBVs mean easier calving**.

Direct: Direct calving ease indicates how this bull influences the birth of its progeny. **High negatives are bad whilst high positives are good.**

Daughters: Daughter's calving ease indicates how well the animal produces daughters that have easier calving. This is an important trait if you are breeding your own replacements. **Again, high negatives are bad whilst high positives are good**.

BIRTH AND FERTILITY

Gestation Length: Gestation Length EBVs (days) are based on AI records and observed natural service. Lower (negative) Gestation Length EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

Birthweight: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. **The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers**.

Scrotal Size: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. **Higher (positive) EBVs indicate higher fertility**. There is also a small negative correlation with age of puberty in female progeny ie, the daughters of bulls with larger testicles may come into season at an earlier age.

GROWTH

Milk: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves. **Bulls with high 200 day milk EBVs have more milky daughters**.

200: 200-Day Growth EBV (kg) is calculated from the weight of the animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages. **The higher the 200 day EBV then the higher the suckled calf or weaning weight.**

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight. **Higher 400 day EBVs indicate earlier maturing progeny with a greater weight at an earlier age**.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight: Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Moderate or larger EBVs are generally more favourable.

CARCASE

Carcase Weight: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days. **An important trait for finished cattle production**.

Eye Muscle Area: Eye Muscle Area EBV (cm2) estimates genetic differences in eye muscle area of a 300 kg dressed carcase**. More positive EBVs indicate better muscling on animals.**

Fat: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300 kg dressed carcase. **More positive EBVs indicate more subcutaneous fat and earlier maturity, leading to a higher fat classification in slaughtered progeny**.

Retail Beef Yield %: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300 kg dressed carcase. **A more positive EBV indicates higher percentage yield for the 300 kg carcase size. This is an important trait in finished steers and heifers**.

QUALITY BEEF INDEX

The South Devon Quality Beef Index is a combination of all traits into a single figure and is a measure of a terminal sire's ability to produce prime steers and heifers for the finished market whilst maintaining calving ease at a reasonable level.

SUCKLER REPLACEMENT INDEX

The Suckler Replacement Index ranks bulls by their genetic potential for the production of female replacements while producing prime steers and excess heifers for beef production, with emphasis on calving ease and maternal traits.

PERCENTILE BANDS FOR 2022 BORN CALVES

(For making comparisons within the breed)

Percentile Band	Calving Ease DIR (%)	Calving Ease DTRS (%)	Gestation Length (days)	Birth Wt. PEDIGREE TRANSFER FEES

Transfer fees will be charged to Purchasers requiring Pedigree Certificates, and they will be debited to their account on the day.

Females over 6 months of age: £30 plus VAT

Bulls: £40 plus VAT

DNA TESTING FOR POLLING

DNA testing of pedigree registered bulls is a compulsory requirement of the Society for the purposes of clarification in this catalogue, bulls and heifers that have been DNA tested for poll status are denoted as such under their lotting details.

Heterozygous polled (HP) – will produce both polled and horned offspring
Homozygous polled (PP) – will produce polled offspring only

Animals registered as polled and DNA tested will no longer be inspected to verify their poll status. Please note that an animal with polled status may express scurring and that buyers should satisfy themselves of the animal in question's observable characteristics prior to bidding.

The animal's name will bear the suffix HP or PP or Z to denote poll status.

NOTICE TO EXPORT BUYERS

Animals available for export (subject to legislation currently in force) are denoted as such under individual lot numbers. Please arrange terms of responsibility with vendor and auctioneer for care of animals, health requirements, export certification, post purchase and prior to export before placing your bids.

CIBA-GEIGY TROPHY FOR MOST POINTS AT SPRING & AUTUMN SHOWS COMBINED:

NBA

National Beef Association

Serving the British Beef Industry

This sale is held under NBA Auction Terms and Conditions of Sale, incorporating Vendor Bull and Female Breeding Warranties. Charges will be payable by Vendor and Purchaser for the use of these Terms and Conditions for this particular Sale which is held under the auspices of the South Devon Herd Book Society. The current charges levied by the NBA are £3 per bull and £2 per female. Copies of the Terms are available from the NBA or the South Devon Herd Book Society

National Beef Association

Concorde House, 24 Warwick New Road, Royal Leamington Spa, Warwickshire, CV2 5JG Tel: 01434 601005

info@nationalbeefassociation.com

IMPORTANT NOTICE TO PROSPECTIVE PURCHASERS

The animals in this catalogue are offered for sale subject to the National Beef Association's standard Terms and Conditions of Sale.

These Terms and Conditions of Sale contain limitations to your rights, and prospective purchasers should appraise themselves of the contents before the sale commences.

They have been drafted to form a fair and reasonable basis for the contract between the vendor and purchaser to give you, as prospective purchasers, confidence in the animals offered for sale. The Terms and Conditions of Sale will be displayed in the Auctioneer's Office in and around the Sale premises on the day of the Sale.

They are also available in a booklet which is obtainable upon request from the Auctioneers, and all purchasers will be offered a copy when they settle their accounts.

SOUTH DEVON BREED DESCRIPTION

COLOUR AND COAT

Strong, curly coat of light medium red colour. Any white under-body undesirable particularly in front of the navel. Hide loose and pliable.

HEAD

Broad and kindly in appearance, with broad and uniformly pink nose and muzzle, free from blue (blotches) and smut (black hair around lips). Horns, if present, should be white or yellow and curve downwards. Ears set well forward and of a good size.

SHOULDERS

Not prominent, blending neatly with a deep body.

BODY

Deep and full in girth. Ribs well sprung, even and extending well back along the spine. Deep in the flank giving a level underline and not an extended gut. Back straight with good width extending from behind the shoulders to the loin.

HINDQUARTERS

Rumps long, wide and square on top. The rounds wide and deep to hocks. The tail should be level set and blend neatly into the rumps. It should be strong with a good brush.

TEMPERAMENT

Docile.

BULL

Masculine characteristics with size and flesh to attain 1,200 to 1,500 kgs at maturity. Testicles of substantial and even size and suspended equally. Twisted testicles are undesirable.

COW

Feminine appearance with good size and even flesh. Even shaped, well-attached udder with well-spaced, equal and moderately sized teats.

LEGS AND FEET

Legs showing good bone, flat rather than round below the hock. The hind legs reasonably straight and parallel with hocks well apart; the fore legs not wide apart and all having good sound feet, pointing directly forwards. Even locomotion with parallel tracking.

POST-PURCHASE MANAGEMENT OF YOUNG BULLS

Purchase

Buy well in advance to allow time to settle – make it a planned rather than a last minute decision. Recommendation is to buy at autumn sale for early spring use or early spring sale for late spring use or May sale for autumn use. On getting the bull home, isolate him for a month. Check his working capability and health and vaccinate/treat as necessary. Try and minimise stress.
Remember, a short working life increases cost. Insurance companies may refuse claims in cases of unsatisfactory management of a bull (see annex to NBA Terms and Conditions of Sale for further management advice).

Feeding

Young bulls are in forward condition at sale and should be allowed to lose condition gradually – they are still maturing. Dietary changes should not be sudden – try and find out the diet prior to purchase so that a stable rumen environment can be maintained. Forage alone will not be sufficient to maintain a young bull which may be anything up to 1200 kg in weight.
Feed concentrates in at least two feeds for one month after purchase. Prior to purchase a bull will likely have been fed on a high concentrate level fed frequently per day.
Ideally do not turn out to grass without supplementary feed for at least 4-6 weeks after purchase.

Housing

Bulls will have been in individual pens with a lot of human contact (walking/grooming) plus several feeds per day. Do not ignore him post purchase by keeping him in a confined space or tied in a dark shed. Provide him with human contact and allow him to see his surroundings even though he is in isolation.
Do not keep him on a slippery floor surface and certainly do not allow him to serve cows on this surface. Look after his feet by trying to keep him on a partial hard surface.

Training

Young bulls are sexually inexperienced. Try and pen bulls where they can see cows/other bulls working. Take a mature cow to him and allow him to serve her several times.

Working

Avoid overwork – young bulls are enthusiastic but have low semen reserves. Target 20 cows in the first season.

Try and get him to take a bit of supplementary feed to maintain body condition score around 3. Remove from cows if it is apparent condition is being lost – it will only lead to barren cows. Check he is serving correctly (over 20% of bulls could be infertile or sub-fertile) so keep a watchful eye and check herd three weeks later. If in doubt, pull him out. It is essential to PD cows after bull removed from herd.

Annually – for all bulls

Being fertile one season is no guarantee. Prior to the next season do bull 'MOT' and fertility check in conjunction with vet. Do not trim feet just before use – plan for 6 weeks before. Feet and legs do a lot of work in mating season. Feed 2-3kg concentrates per day prior to mating season to build condition ready for an active season. Adapted from 'Bull selection made simple – a guide for the commercial buyer', published 2011 by SAC and QMS.
